

Program 41.03.05 "INTERNATIONAL RELATIONS"

Major: International Scientific Technological and Industrial Cooperation

Objectives: The program educational concept is unrivalled among Russian universities and is aimed at training specialists with deep interdisciplinary knowledge and practical skills, who are confidently oriented in various spheres of international relations and are able to make decisions rapidly in an ever-changing environment.

The program is an innovative educational product that shapes the competence of students in the fields of international political, scientific, technical, information and economic activities; financial, economic and competitive analysis of world markets of high technologies; management of international scientific and technological projects.

Students learn to put into practice a unique method for analyzing a large array of unstructured information – situational express analysis. Students are trained to work commercial and non-profit organizations, research institutions and transnational companies in Russia and abroad.

Being the "talent foundry" for the State Corporation ROSATOM in the field of international relations and international business, the Institute attracts experts to work with students to transfer necessary knowledge and practical experience.

Professional level of knowledge and fluency in at least two foreign languages allow graduates to practice as analysts and researchers in the largest Russian and international organizations.

The distinctive feature of BA program is the ability of graduates to develop specialized automated mechanisms for collecting, analyzing and visualizing information using multi-agent technologies.

Program partners:

- Russian federal ministries and agencies (Ministry of Foreign Affairs, Ministry of Science and Higher Education, etc.);
- Russian state corporations (ROSATOM, RUSNANO, ROSTEC, etc.);
- Foreign representative offices of Russian state corporations;
- International organizations (IAEA, UNESCO, UNIDO, etc.);
- Research institutions and mega-science projects (Joint Institute for Nuclear Research; Scientific and Technical Institute of Intersectoral Information, National Research Centre; “Kurchatov Institute”;
- Russian Academy of Sciences, CERN, NIKA, ITER, etc.).

Tuition fee per year: 319 000 Russian rubles

Program coordinator: Evgeny M. Morozov, Associate Professor, PhD
